Hollow Floating Mirror

HOLLOW FLOATING MIRROR

CONCEPT:

Mirrors are commonly used for looking at ourselves, for seeing self in an outsider's point of view; and we use mirrors at least once everyday. To observe our reflection on a daily basis so often, turns it into an ordinary experience. Hollow, aims to put a new perspective to this experience by creating a momentary diversion through an illusion.

A metal circular frame acts as a stand for the mirror and creates a deception as if it is floating in the air, by a well hidden connection detail. Hollow, adds a simple illusion to a well established everyday object, a mirror, turning it into an object of desire as well as a functional good.

Wait until you see your reflection on this mirror. You'll love the floating image of yours.

HOLLOW BIG MIRROR

Dimensions: 32 x 19 x 30 cm
Mirror Size: Ø 24 cm
Options: Copper & Brass
STK: HLW01
Retail Price: **\$90,00**

HOLLOW SMALL MIRROR

Dimensions: 24 x 14,5 x 22 cm
Mirror Size: Ø 17 cm
Options: Copper & Brass
STK: HLW02
Retail Price: **\$80,00**

MATERIALS AND PRODUCTION:

Round cut mirror is placed into a copper/brass nest handcrafted by metal spinning and placed on an iron stand shaped by bending and welding. The incline that is needed for its use, is provided by its connection detail that holds all elements together.
