Blank Desk Organizer

# BLANK DESK ORGANIZER

## CONCEPT:

Blank Pen is a stylish and fun way of organizing your work desk. The brass or copper containers are designed in a way that cannot stand on their feet and therefore needs a little bit support from the metal stand that joins them all.

While the pen section is standing upright to support your pens, paper-clip container can move as you wish within its sphere for convenient access from all directions. The bent steel black stand also serves as a carrier for your cards.

Blank adds a little flair to your working spaces by organizing your desktop and being an inspiration itself by its beautiful elegance of practicality.

## MATERIALS AND PRODUCTION:

Blank's containers are handcrafted by metal spinning of copper and brass sheets. They are brushed to obtain the satine finish and laquered to protect the look for years.

The electrostatic black oven painted steel stand is lazer cut by precision for a close fit to the containers, and bent for a strong stand on ground.
